Lofting Instructions
17th, Bailey, Frontier, Sanford
metal stabilizer bar

1. Remove mattress from frame and insure bed frame is secured in middle notch of bed ends.

2. Slide latches into wooden bed ends.

3. Slide metal latches into bar, then secure bar in middle notch between both bed ends.

4. Lift bed frame onto base.

5. Add mattress and safety rail.

Caution: Be careful not to hit the sprinklers while lifting the bed, and ONLY attempt with at least 2 people.
